What is Copy Trade all about?

For investors

Copy Trader is a dynamic social trading platform which allows investors to view and connect with traders, money managers and fellow investors from all over the world. Not only is there the social advantage of collaboration with other like-minded individuals but as an investor, you are also able to copy the trades of professional traders directly to your trading account.

The key advantages of the Copy Trader platform are:

- Detailed Trader Statistics - Every trader who lists on the Copy Trader platform is subject to the same rules and regulations. Their performance statistics are transparent and available for all investors to view. Investors can then decide which traders suit their risk appetite and copy their trading signals directly into their trading account.
- Automated Trading - Set up your trading rules and allow the system to trade automatically according to the rules which you have set. This also means that you can continue to take care of your usual responsibilities while your account is working for you.
- Trader Combinations - Portfolio diversification is a good way to mitigate risk and optimise performance. Selecting dynamic combinations of traders allows you to maximise your performance and minimise your risk. It's like having a full fund management team in the palm of your hand.
- Profit Sharing Accounts - This is the fairest way to increase alignment between traders and investors. What this means is that traders are paid

according to their trading performance and investors only pay the traders when they make money.

How to follow a trader

For money managers and traders

As a money manager, it is of paramount importance to ensure that your clients are satisfied with the performance of their investments. It is just as important to make sure that their funds are held securely and that the technology used to distribute their returns is accurate and trustworthy. Transparency is a big part of client satisfaction in the investment industry and the JP Markets Copy Trader makes your life a lot easier in this regard.

The key advantages of the Copy Trader platform are:

- **Trader Registration** - Register as a trader on the Copy Trader platform and allow your clients to view all your trading statistics with a few clicks of a button. Your trading statistics will also be available to all Copy Trader investors which means that you immediately gain access to a global client database.

- Copying Trading Signals - Your clients and all other investors on the Copy Trader platform will be able to copy your trading signals directly to their trading accounts. No more need for extensive hardware and software setups with hundreds of trading accounts to link and unlink upon request.
- Technological Advancements - Copy Trader is at the forefront of copy trading systems with far more in depth analytics and user tools than any other social copy trading platform. This means that your clients will always have all the info they need without needing to call you every five minutes. Streamlining your business model allows you to focus on reaching more potential customers and growing your business.
- Profit Sharing Accounts - The fairest way to increase alignment between traders and investors. This means that traders are paid according to their trading performance and investors only pay the traders when they make money. As a successful money manager or trader you will have thousands of potential customers on the Copy Trader platform.
- Automatic Customer Payments - One of the most frustrating things to deal with is the monthly calculations required to invoice payments from large amounts of customers. Managing those payments and customer access to trading strategies based on their payments can be a huge headache. With the JP Markets Copy Trader, all of the calculations are taken care of for you and automatically allocated to your profile.

To register as a money manager or trader, simply go to the [Copy Trader website](#) and register your JP Markets live trading account. Once you have done this, please notify us via support@jpmarkets.co.za that you would like to register as a master trader on the Copy Trader platform.

For introducing brokers

As an introducing broker, it is of paramount importance to ensure that your clients are satisfied with the service that they receive and the products which you promote to them. A thorough understanding of the products offered and the ability to service the client with regards to all of the products and choices they have are what separates successful IB's from those who are not.

All of the advantages mentioned for investors, money managers and traders can be applied in building a very successful IB business through the Copy Trader platform. Whether you are an experienced money manager or starting out in the industry, the tools available on the Copy Trader platform present a unique opportunity to build a substantially rewarding business.

Due to a complete solution in terms of trader analytics and the ease of use of the social trading platform, introducing clients to the Copy Trader option is an easy process. General investment vehicles, although less risky, don't offer the type of returns that are available with Copy Trader. Social trading is taking the world by storm as it offers a viable investment option which can generate well above market average returns while being easy to manage and completely transparent.

When introducing customers to the JP Markets Copy Trader platform, our IB's will still receive their remuneration as set out in their IB agreement. This will include both commissions on deposits and the rebate structure on volume of lots traded. This means that as an IB, you will be able to use the performance of selected traders to promote social copy trading to your potential customers.

Using this strategy will provide your customers with a dynamic trading tool that is easy to understand and use and presents excellent investment options. This will improve client retention and satisfaction which will result in larger deposits, higher volumes on lots traded and substantial commission returns for committed introducing brokers.

With all of these tools at your disposal, your IB business with JP Markets has no limits so get out there, start networking and build the future you have always dreamed about. What you put in is what you will get out.

To register as an Introducing Broker for JP Markets, click on the following link to download the JP Markets IB agreement: [download now](#)

Read through the agreement carefully and then do the following:

1. Fill in your details and MT4 account number on the first page
2. Initial each page in the bottom right hand corner
3. Sign in full on the last page where it states "on behalf of the IB"
4. Scan and email the agreement to support@jpmarkets.co.za
